

### STAR LIGHT ▲

Enjoy a celestial light show in your garden by night and a work of art by day with Starlight Lanterns' Comet. As you move around the 4-foot-high fixture, lights appear to twinkle as they shine through the metal cutouts. Its rust-resistant base is made of powder-coated steel. The globe is made from plastic with a UV additive, so it won't yellow or turn brittle. Find this and other light designs at Paddock Pools, Patios & Spas, (480) 947-7261.

## GARDEN TIP

Placing additional hummingbird feeders in a garden will support more hummers and help hinder the birds' territorial nature.

—The Hummingbird Society

### ◀ ROSY OUTLOOK

California-based New Biology Inc. recently introduced a garden product designed to grow healthier, better-performing roses. Jaz™ Rose Spray, a biodegradable, nontoxic plant strengthener, is said to improve roses' natural resistance to disease, drought, temperature fluctuations and salt. The plant nutrient is available in a concentrate or ready-to-use spray and can be purchased online at [jazzsprays.com](http://jazzsprays.com).

### FRENCH TWIST ▲

The elegant Sonia planter, with its hint of French styling, boasts a slim tapered shape, soft curve, and beading detail under its rim. The lightweight fiberglass pot from Ames True Temper comes in Treasure Blue (pictured), Red Glaze and Olive Glaze and is available in three sizes. It can be found at Jo-Ann Fabric and Craft Stores.
